Emergency Use Authorization

The FDA has made the COVID-19 vaccine available under an emergency use authorization (EUA). The EUA is used when the FDA has determined that circumstances exist to justify the emergency use of a drug and/or biological product during an emergency, such as the COVID-19 pandemic. This vaccine has not completed the same type of review as an FDA-approved or cleared product. However, the FDA's decision to make this vaccine available under an EUA is based on the FDA's determination: (i) of a public health emergency, and (ii) that the totality of scientific evidence available to the FDA shows that the vaccine may be effective in preventing COVID-19 and that the known and potential benefits of the vaccine outweigh its known and potential risks.
