Dear Volz Families,

On the week of November 10th, students will participate in state field testing as required by the NJ Department of Education (NJDOE). The state uses these tests to try out potential test questions for use in the newly developed spring NJSLA assessment. The field test does **not count** toward student grades or school performance measures.

Why we participate: New Jersey requires participation in field testing. While we understand testing can be disruptive and time-consuming, our goal is to minimize the impact on regular instruction and keep students' focus on learning.

Who is testing: All students in grades 4 through 8 will participate.

What students need to bring: A fully charged Chromebook

Thank you for your understanding and cooperation as we complete this required process.

Steve Pili

Principal
